

Library & Archival Digitization Services for Collections, Records & Repositories

In-Depth Experience with NLM/JATS, HighWire, METS/ALTO, PRISM & More

Bridge the gap between historical collections and the latest technology with DCL's library digitization services for records, collections, and repositories.

Preserve valuable collections and reduce costs, save space and improve service with DCL.

- Centralized databases
- Online services
- Mobile apps
- Specialized electronic enhancements

DCL is adept at working with archival and unique projects including special handling techniques required for rare fragile documents.

DCL is attuned to the special requirements central to sensitive conversions, and adapt our capabilities to fit each project's requirements including performing onsite services in the case of rare and highly valuable collections. We work closely with each institution to:

- **Develop** correct methodology
- **Produce** extremely accurate and easily-accessible database files
- **Best serve** individual community and the institutional world at large.

DCL has in-depth expertise with most DTDs and schemas used for scholarly literature.

- NLM/JATS, HighWire, METS/ALTO, and PRISM, as well as variations of these.
- **Conversion** from paper, microform, CD, or electronic formats to deliver fully-tagged and searchable files
- **Conformance** with a wide variety of standard DTDs, including XML, HTML, TEI-Lite, or proprietary specifications.

DCL offers expertise in creating images (TIFF, jpeg, PDFs, etc.) and cleaning up and resizing existing ones. We also are skilled in the creation and extraction of metadata, and we produce MARC records quickly and economically.

Our expertise includes:

- **Libraries** – Public, academic, corporate, governmental, research, and special library collections and repositories.
- **Museums** – Archives, libraries, special collections, and records-keeping.
- **Universities** – Archives, libraries, databases, student records, bookkeeping, and curriculum management.
- **Notable projects** – Library of Congress, the Smithsonian Institution.

The digitalization options faced by today's institutions are numerous, varied, and complex. DCL addresses these challenges backed by more than three decades of experience. We provide the highest quality standard in the industry, delivering projects with an accuracy rate as high as 99.997%.

Uncompromised quality 100% of the time!
